

ONOPAH'S RICHES ARE WONDERFUL

Judge Dickson Says the New
Camp is a Marvel.

STOCKHOLDER'S REPORT

O'MEARA BROTHERS WILL PILE
UP A FORTUNE.

Judge W. H. Dickson, W. P. O'Meara and Clinton A. Higbee, a business man of Philadelphia, and one of the chief stockholders in the Tonopah Mining company, came in from that town Tuesday morning and yesterday and the day after will proceed on his way home.

Judge Dickson stated during the afternoon that for the amount of development work done the camp was a marvel. Instead of five or six veins commonly reported, the judge deems there are no less than fourteen veins all capable of profitable production. Up to date the discoveries have been confined to a very small territory, but the chances are more than even that other discoveries will be made in that region in the near future. The judge was greatly impressed by the manner in which mining is being carried on there, and says the camp has a great future. The O'Mearas and their associates, the judge says, are sure to make a comfortable fortune out of their lease, even though it is at the end of the year only to run, and all of whom were anxious to just what kind of a proposition had become interested in, not the standpoint of experts, but as a plain business man's standpoint. He doesn't claim to be a mining man, but Mr. Higbee, "and for that reason secured the services of a gentleman who is going to accompany me to the various workings and take samples. That work was done with a view of getting as close to the truth of what the lodes would average as we possibly could. Forty-five different samples were taken and the entire average was over \$400 per ton. Included in the samples were three that came from very high-grade streaks—streaks that ran away up into the thousands—and when they were analyzed the balance showed an average of \$30 per ton, the values running uniformly one-third of gold and two-thirds of silver.

W. P. O'Meara reported that he found 700 or 800 people in the camp, with sixty miles of working on that many different parts of the company's eight claims, with over 100 tons of rich ore going out daily. At the present rate, he says, the royalties paid the Tonopah company will more than pay the \$500,000 purchase price, and big earnings are then assured. The deepest shaft is down about 124 feet, and from the bottom the company is taking out \$1,000 ore. If the lodes continue down for even another 100 feet, he says, the production of the famous Comstock will be duplicated.

NEW FIND IN PARK VALLEY.

Rich Gold Ledge Located by Ollie Young on Dove Creek.

Ollie Young, the well-known Deep Creek prospector and claim owner, has returned from a month's trip to the Park valley district, where he succeeded in locating a rich ledge of gold at the head of Dove creek, four miles west of the center. The vein, Mr. Young says, averages all the way from 10 to 20 feet wide on the surface and crops out boldly for a distance of 500 feet at least through the mountains. He claims that he planted location notices upon and staked out previous to his return.

The gentleman brought back a load of samples from the ledge, and yesterday pronounced by experts on Park valley rock to be the finest specimens of cropping ore ever found in the district. They consist of a rich-looking sugar quartz, shot up with cube iron and splashes of the peculiar, dark-looking galena that in the ore of that section run high in gold. Much of the rock exhibited contained free gold and free of it, and from panmilling made on the ground Mr. Young secured streaks of the yellow stuff that indicated values running anywhere from \$40 to \$200 per ton.

As every piece of rock secured was broken off with a sledging blow, it is more than confident that a little work will show up a bonanza, and with that belief, he will outfit during the next few days and go back to camp. The ledge, Mr. Young says, runs at an angle to the general trend of the mountains in that section and the formation like a true fissure, which he believes it will prove to be. He reports that he has not yet secured any good strikes, but he is confident that he will be able to secure many good strikes will be rewarded before winter closes in.

BACK TO IDAHO.

Tex Tarbet Reports on Humming Bird and a New Copper Camp.

Tex Tarbet has returned from a month's trip to the old Humming Bird camp, above Paris, Ida., and reports a new copper camp ten miles from Montpelier. The camp is located in a new copper vein, and he has secured a large sum of money by selling up internal divisions in the corporation have kept for several years. Being largely interested in the new copper camp, he has left the old camp and is now on his way to the new property about ten miles from Montpelier, where considerable mining is being done. The gentleman looking through the country through which he has been located for several miles.

Colonel George W. E. Dursey has returned from a business trip east. P. L. Kimberley returned from Chicago Sunday and will be either going down to Gold Mountain or the coast. He had not determined yesterday afternoon which way he would make first.

Robert Mulhall, superintendent at the Montana Consolidated property, adjoining the Ophir Hill, came in from camp yesterday. The shaft, he says, is being sent down as rapidly as three shifts can send it.

Scott Grierson and Walter P. Jennings had a verbal call on Samuel McInnes's holdings in the Mammoth at \$3 per share, but the deal is not yet closed. The gentlemen believe they have a good chance of selling it.

Like all the other laboringmen, the brokers took a layoff yesterday. The mining men are shortly expected. The entire bottom of the hill is now in the hands of the laboringmen. The entire bottom of the hill is now in the hands of the laboringmen.

Jackling, formerly superintendent of the Silver Star mine, came in from the west yesterday and reported that the Silver Star mine was working at a profit. He was warmly greeted by his friends yesterday.

OUR ANTEDILUVIAN ANCESTORS.

(COPYRIGHT, 1901, BY W. R. HEARST.)

"What are they chasing Stonehammer for?"

"Oh, he's trying to get up a scheme to make everybody pay taxes."

"That crank will get lynched 'he first thing he knows."

will be increased to at least \$6 per share.

The trust company then inquired if the stockholder wants to join in the move to combine interests and secure recognition of the company's claims.

The idea seems to be that a number of the eastern minority holders have conceived the notion that unless a combination effort is made to protect themselves the may be frozen out, and the Union Trust company has consented, at least in principle, to the plan.

GOLD ON THE WEBER.

Prospectors Said to Have Made Find on Smith & Moorehouse Fork.

After two weeks at the head of the Weber river, Brig H. Young returned to town yesterday. While he was out merely on a fishing trip, he met a Mr. Flowers and other prospectors who were working in the vicinity of the mouth of the river.

He was also informed that some O'Brien and Caville parties were getting very nice lead-silver ore from a property on Beaver creek, south of the mouth of the river.

EUYING INTO STATELINE MINES

Montana Capital After Big Fourteen Company's Sunflower Group.

Word from State line is to the effect that a Mr. Clark of Montana, who recently visited that growing camp, became favorably impressed with the Sunflower property that he purchased 30,000 shares of the company.

Mining Notes.

Colonel George W. E. Dursey has returned from a business trip east. P. L. Kimberley returned from Chicago Sunday and will be either going down to Gold Mountain or the coast.

Robert Mulhall, superintendent at the Montana Consolidated property, adjoining the Ophir Hill, came in from camp yesterday. The shaft, he says, is being sent down as rapidly as three shifts can send it.

Scott Grierson and Walter P. Jennings had a verbal call on Samuel McInnes's holdings in the Mammoth at \$3 per share, but the deal is not yet closed.

Like all the other laboringmen, the brokers took a layoff yesterday. The mining men are shortly expected. The entire bottom of the hill is now in the hands of the laboringmen.

Jackling, formerly superintendent of the Silver Star mine, came in from the west yesterday and reported that the Silver Star mine was working at a profit.

conino company's big copper bonanza, is down from his Rich county home on his way back to camp.

The machinery for the new Hill process leaching plant, he says, is being in as rapidly as teams can get over the road with it.

W. F. Snyder and W. G. Elder of the Western Exploration company, came in from the west yesterday after having looked into a big proposition to which their attention had been directed.

Messrs. Bryant, Hinds and Killgannan, the Butte mining men who went down to Mifflin last Thursday to inspect the copper zone running through the mountain to beyond Frisco, returned Saturday night.

The 3c rate to Lagoon and return will remain in effect during the national guard encampment, Sept. 3 to 11. Trains leave Salt Lake 7 a. m., 9 a. m. and 3:30 p. m. Last train leaves Lagoon after taps.

SLOW HEALING SORES

With rich, pure, strong blood one is never troubled with sores or ulcers. A cut or any injury to the flesh heals in a few days, nature supplying the healing process.

Swollen joints and inflamed glands often break out into offensive, slow healing sores. A polluted blood is always a menace to health; not only does it keep the skin in a chronic state of inflammation, but every organ and fibre of the body suffers from an impure and sluggish circulation.

Sores and ulcers are most often caused by poverty of the blood and a weak and slow circulation, brought on by long continued sickness, malarial poisoning, torpid liver, the use of mercury, or whatever is calculated to destroy the vitality of the blood and break down the constitution.

Nothing so quickly or surely restores lost strength and vitality to the blood as S. S. S. It is an antidote for the severest forms of Blood Poison, as well as the irritating humors that cause the eruptions and sores that sap your very life and so greatly disfigure you.

S. S. S. is the only guaranteed purely vegetable blood purifier. It contains no mercury, potash, arsenic or other harmful drug. It cleanses the blood and purifies the circulation, thus ridding the system of the impurities that keep the sores feverish and painful.

At the same time your general health improves under the tonic effects of S. S. S., and the skin becomes soft, smooth and healthy. If you are troubled with boils, carbuncles, sores or eruptions of any sort, write our physicians all about your case; don't risk your own judgment when you can get medical advice from experienced doctors free. Book on Blood and Skin Diseases to all who desire it.
